A.SOAL

Task 1: Variables and Data Types

1. Declare the following variables:

- An **integer** named *age* with a value of 25.
 - A **float** named *height* with a value of 5.8.
 - A **string** named *name* with a value of "Saya".
 - A **boolean** named *is_student* with a value of *True*.
2. Print the values and their data types.

Task 2: Arithmetic Operations

Write a Python program that:

1. Takes **two numbers** as input from the user.
2. Performs **addition, subtraction, multiplication, division, and modulus** on them.
3. Displays the results.

Task 3: Conditional Statements

Write a program that:

1. Takes a number as input from the user.
2. Checks if the number is **positive, negative, or zero**.
3. Prints an appropriate message.

Task 4: Loops

Write a Python program that:

1. Uses a **for loop** to print numbers from **1 to 10**.
2. Uses a **while loop** to print numbers from **10 to 1**.

B.PRAKTIKUM

1.Task 1

```
tesk.py x tesk2.py tesk3.py task4.py install_py
tesk.py > ...
1 # Deklarasi variabel
2 age = 25
3 height = 5.8
4 name = "Saya"
5 is_student = True
6
7 # Cetak nilai dan tipe data
8 print("age:", age, "type:", type(age))
9 print("height:", height, "type:", type(height))
10 print("name:", name, "type:", type(name))
11 print("is_student:", is_student, "type:", type(is_student))
12
```

```
PS C:\pengolahan citra digital> & "C:/pengolahan citra digital/myenv/Scripts/python.exe" "c:/pengolahan citra digital/tesk.py"
age: 25 type: <class 'int'>
height: 5.8 type: <class 'float'>
name: Saya type: <class 'str'>
is_student: True type: <class 'bool'>
PS C:\pengolahan citra digital> 
```
